Lab exercise week 5 – Screenshots

1. Home Route

The screenshot shows the Postman API client interface. On the left, a sidebar lists collections and API tests, with 'GET Home Route' selected. The main panel displays the details for the 'Home Route' test. The method is 'GET' and the URL is 'http://localhost:8081/home'. The 'Params' tab is active, showing 'Query Params' with a table with 2 columns: 'Key' and 'Value'. The 'Body' tab is also visible, showing the response body in HTML format. The response status is '200 OK' with a response time of '21 ms'. The response body is a valid HTML document with a title 'Express Home' and a main heading 'Welcome to ExpressJs Tutorial'.

API tests / Home Route

GET http://localhost:8081/home

2. Profile Route

The screenshot shows the Postman API client interface. On the left, a sidebar lists collections and API tests, with 'GET Profile Route' selected. The main panel displays the details for the 'Profile Route' test. The method is 'GET' and the URL is 'http://localhost:8081/api/v1/user/profile'. The 'Params' tab is active, showing 'Query Params' with a table with 3 columns: 'Key', 'Value', and 'Description'. The 'Body' tab is also visible, showing the response body in JSON format. The response status is '200 OK' with a response time of '15 ms' and a response size of '660 B'. The response body is a JSON object containing user profile information, including id, name, username, password, email, address, phone, website, company, and catchPhrase.

API tests / Profile Route

GET http://localhost:8081/api/v1/user/profile

23   }
24 }
```

3. Login Route (Valid Username)

The screenshot shows the Postman interface for the 'Login Route' (POST). The request is sent to `http://localhost:8081/api/v1/user/login` with a JSON body containing `username: "bret"` and `password: "bret@123"`. The response is a `200 OK` status with a JSON body indicating success: `status: true` and `message: "User Is valid"`.

Request:

```
POST http://localhost:8081/api/v1/user/login
```

Body (raw):

```
{
  "username": "bret",
  "password": "bret@123"
}
```

Response:

```
200 OK • 30 ms • 276 B
```

Body (JSON):

```
{
  "status": true,
  "message": "User Is valid"
}
```

4. Login Route (Invalid username)

The screenshot shows the Postman interface for the 'Login Route' (POST). The request is sent to `http://localhost:8081/api/v1/user/login` with a JSON body containing `username: "brettest"` and `password: "bret@123"`. The response is a `200 OK` status with a JSON body indicating failure: `status: false` and `message: "User Name is invalid"`.

Request:

```
POST http://localhost:8081/api/v1/user/login
```

Body (raw):

```
{
  "username": "brettest",
  "password": "bret@123"
}
```

Response:

```
200 OK • 12 ms • 284 B
```

Body (JSON):

```
{
  "status": false,
  "message": "User Name is invalid"
}
```
